Learn Cloud Architecture with Amazon Web Services (AWS)

INFS 4460, INFS 7460, and ENGR 4460

Amazon is the top cloud service provider in the world (34% of the Cloud Services market in 2017), offering over 90 different web services to their clients all over the world:

- database management systems,
- virtual machines and networks,
- big data and data analytics tools,
- development platforms,
- cloud management tools,
- and many others.

Hundreds of companies use its services, and many of them (such as Expedia and Hulu) are now entirely in the Cloud.

In 2017 **RMU became the first university in PA** to join the AWS Academy – the program, designed to train the faculty to teach the course in AWS. The goal of the course is to prepare the students for the **AWS Cloud Architect certification exam**.
